DETAILED ACTION

Claim Objections

Claim 13 is objected to because of the following informalities: the claim recites "nonbirefringement laser medium" and also recites "without the exhibition of birefringences", which appears to repeat the limitation. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 10 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 10 recites the limitation "said laser cavity" in line 6. There is insufficient antecedent basis for this limitation in the claim.

Regarding claim 10, it is not clear what applicant's considers a "regular" laser cavity.

Claim 15 recites the limitation "said nonlinear crystal" in line 4. There is insufficient antecedent basis for this limitation in the claim.

Regarding claim 15, it is not clear what applicant intends to encompass with the limitation of the third harmonic generation, because the limitation is repeated, it is not clear if only one is to be selected.

Regarding claim 15, it is not clear what applicant intends to encompass with the limitation of the frequency mixing, because the limitation is repeated, it is not clear if only one is to be selected.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Siebert (PN 3,582,815).

Figure 2 illustrates a solid state laser including two mirrors (10), (18), a solid state laser medium (12), the illustrates a gain region (shaded), a wavelength selective etalon (24), the figure illustrates the gain region in a narrow region and adjacent to mirror (10). Column 2 lines 10-14 discloses the single mode operation.

Siebert discloses the use of flash lamp as a pump source, but is silent as to the pump source being laser diode bars.

However, the use of laser diode bars as pump sources for solid state lasers is notoriously well known in the art due to its cost effectiveness, Spectra Diode Labs provide such commonly used laser diode bars.

Allowable Subject Matter

Claims 1-9 are allowed.

The following is an examiner's statement of reasons for allowance:

None of the searched prior arts alone or in combination discloses the claimed method limitations of independent claim 1, having the combined recited steps for forming a laser cavity to obtain stable single mode operation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Claims 11, 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 13 and 14 depend from claim 12.

Claim 15 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
